Subject: Application for Entry-Level Software / Full Stack Java Developer Position

Dear Hiring Manager,

I am writing to express my interest in an entry-level software development opportunity within your organization. I have completed my Master of Computer Applications (MCA) from Atria Institute of Technology, Bengaluru, with a CGPA of 6.8 in 2025. I am eager to begin my professional career in the IT and software industry, where I can apply my programming, problem-solving, and analytical skills while continuing to learn and grow.

My technical background includes Full Stack Java, HTML, CSS, JavaScript, React, Node.js, Git/GitHub, and VS Code. During my 8-week Java Programming Internship at CodTech IT Solutions, I gained practical experience in core and advanced Java concepts, object-oriented programming, exception handling, collections, multithreading, JDBC, console applications, and mini-GUI applications. The internship also strengthened my understanding of debugging, clean coding, version control, and real-time project workflows.

I have also worked on academic projects involving IoT, Python, machine learning, and data analysis. My projects include a Gesture-Controlled LED Home Automation System using Arduino Uno, Heart Disease Data Analysis using Python and machine learning, and Electricity Theft Detection in Smart Grid based on machine learning. These projects have helped me develop practical problem-solving skills and an ability to work with technology to address real-world challenges.

I am a continuous learner who is motivated to contribute effectively to an organization and develop strong professional expertise. I would welcome the opportunity to discuss how my skills and academic background can contribute to your team.

Thank you for considering my application. I look forward to hearing from you.

Sincerely,

AKASH
